Theme for phptemplate on Drupal

To install template please follow instructions below:
- copy theme to the theme folder of your drupal installation
- login as an administrator
- go to administer- Site building- themes
- from the list of templates find the template that you need to enable
- set to enabled and default
- click save settings

If your template has one or several custom blocks you have to set them up in the following way:
go to Administer -> Site building -> Blocks above the template list find navigation tabs click Add block.

In order to make site look like on our live demo you have to set blocks to preset regions. To do that login as as administrator, go to administer  ->  site building  ->  blocks  and set blocks to positions listed below.

| Block name | Region | Sort order |
|---|---|---|
| Navigation | Left sidebar | 1 |
| User Login | Left sidebar | 2 |
| Latest News | Left sidebar | 3 |
| Most Recent Polls | Right sidebar | 1 |
| Who's Online | Right sidebar | 2 |
| Popular | Right sidebar | 3 |
